EXAMINER'S AMENDMENT/COMMENT

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the indication of the allowability of claims 1-20 is the inclusion therein of the limitations of a fixer (enhancing, improving liquid, etc.) printhead comprising a plurality of fixer nozzles and being arranged to apply fixer in a plurality of spaced parallel line to a region of a print media, each line being detected by an optical detector. These limitations are neither suggested nor taught by the prior art of record, in combination as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Pertinent Prior art

U.S Patent 6,572,213 issued June 3, 2003 to Valero discloses detecting invisible ink drops.

U.S Patent 6,637,853 to Ahne et al. (col. 2; lines 1-10) discloses detecting light reflected from test image thereby to detect malfunctioning nozzles. However, it does not suggest detecting clear fixer liquid.

U.S Patent 6,655,797 to Smith et al. discloses printing normal inks color on top or under the liquid fixer by way of their nozzles arrangement. However, it does not suggest detecting clear fixer liquid.
